## MISSION STATEMENT

It is the mission of Family Behavioral Resources to be a leader in delivering the highest quality of recovery-oriented mental health services. Services are designed in accordance with FBR's philosophy of care, and delivered through a variety of theoretical approaches and interventions based on evidence-based practice. We are committed to supporting children, families and their surrounding community with quality care which upholds the utmost integrity. *Here, caring is everything.*

## OUR PHILOSOPHY

FBR does not embrace one specific method or theory to treat our consumers. We respect children's unique perspectives, culture, learning styles and behavioral needs as well as the family's identification and prioritization of current need areas.

In accordance with FBR's commitment to ensure that consumers and their families have access to an individualized treatment program, each consumer is afforded the opportunity to consent to the completion of a functional behavior assessment (FBA) at the on-set of treatment. Information gathered during the FBA is then utilized in order to develop a comprehensive treatment and behavioral intervention plan (TBIP). A FBA is also available at any time throughout the course of treatment if indicated by a change in consumer behavioral presentation.

## WHAT IS BEHAVIORAL HEALTH REHABILITATION SERVICES (BHRS)?

BHRS or Wraparound services is a Medicaid-funded program designed to provide services to children under 21 years of age that have a current mental health diagnosis. These services are designed to increase the level of psychosocial functioning and well-being, so less

intensive services will be required. A clinical licensed psychologist or psychologist assistant conducts an evaluation to assess the needs of the child/adolescent to determine the most appropriate level of service. If BHRS is deemed medically necessary and is recommended, the team might consist of any or all of the following team members:

**Behavioral Specialist Consultant (BSC)** ~ A master's level mental health professional who consults and collaborates with all members of the treatment team. The BSC maintains clinical oversight of the case, including development of the treatment plan, clinical programming and mentoring the

**Mobile Therapist (MT)** ~ A master's level clinician who provides individual therapy for the consumer.

**Therapeutic Staff Support (TSS)** ~ A bachelor's level clinician that works one-on-one with the consumer and implements the interventions developed by BSC.

Wraparound is a **process** designed to improve the lives of consumers with complex psychological or behavioral needs. It is not a specific program or protocol. Therapy is available 7 days a week and becomes part of the consumer's daily routine. Hours prescribed will vary, depending on the severity of impairment. Sessions are scheduled according to the family's needs, and are available day or night, and also on weekends when necessary. Services are provided in the home, community, and/or the educational setting.

## GOALS OF BHRS INCLUDE:

- *Assessing the child's and family's strengths, needs, abilities and preferences*
- *Setting individualized goals for the child*
- *Setting individualized goals for the family*
- *Developing and implementing an individualized clinical program designed to target problematic behaviors and facilitate the development of prosocial behaviors*
- *Evaluating treatment on an on-going basis in order to determine the efficacy of current treatment modalities/behavioral interventions*
- *Setting goals for discharge*

## TREATMENT APPROACH

FBR ensures that all therapeutic approaches utilized within the provision of services fall within the framework of Applied Behavior Analysis (ABA) and/or research-based behavioral health treatment. Staff work collaboratively with each consumer's family and extended support system in order to identify and implement appropriate intervention(s) to target the individualized needs of each consumer.

Staff receive a variety of trainings initially as part of an orientation process as well as ongoing to enhance their role as a clinician. Current trainings include topics such as:

- *Behavioral Modification and Crisis Intervention*
- *Typical Child Development*
- *Child Abuse*
- *BSC & TSS Clinical Training*
- *BHRS in the Educational and Community Settings*
- *Cultural Competency*
- *Basic Principles of ABA*
- *It Shouldn't Hurt to be a Child – Trauma and Attachment, Part I and II*
- *Values, Ethics and Professional Boundaries*

## OUR PLEDGE TO SERVICE:

FBR's purpose is to provide competent BHRS services in accordance with CASSP principles:

- *Child-centered*
- *Family-focused*
- *Community-based*
- *Multi-system*
- *Culturally Competent*
- *Least Intrusive / Least Restrictive*
